

This application was created with the idea of helping older adults. In this quarantine, they should not leave their homes because they are in risk but we also know that there are many adults who do not have anyone who could support them. In order to find people who want and would like to help them, we created this app.

Help with love shop

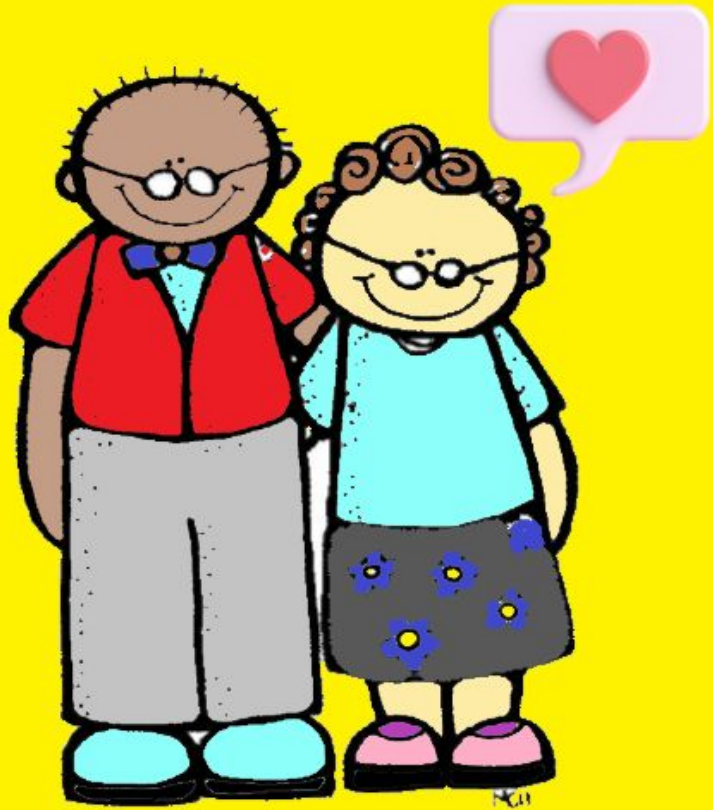

- ★ This is the name of the application.
- ★ We chose this name because it is lovely.
- ★ Obviously it has to do with what the application is about.
- ★ it is not very long, and the most important thing is that it is easy to remember.

WHAT "HELP WITH LOVE SHOP" IS FOR?

- This app is to help old people.
- When an adult needs to buy something such as bread, milk or some medicine, he or she will get into this app and put his/her location and what she/he needs.
- Then, HELPERS will receive a signal from the app.
- Helpers will see where the adult is and the thing the person needs.
- If a person agree to be help, a private chat will be open between them (granny - helper) .
- There they can chat about time, shops or even prices, (they can also send voice messages).
- The "delivery" doesn't have any cost.

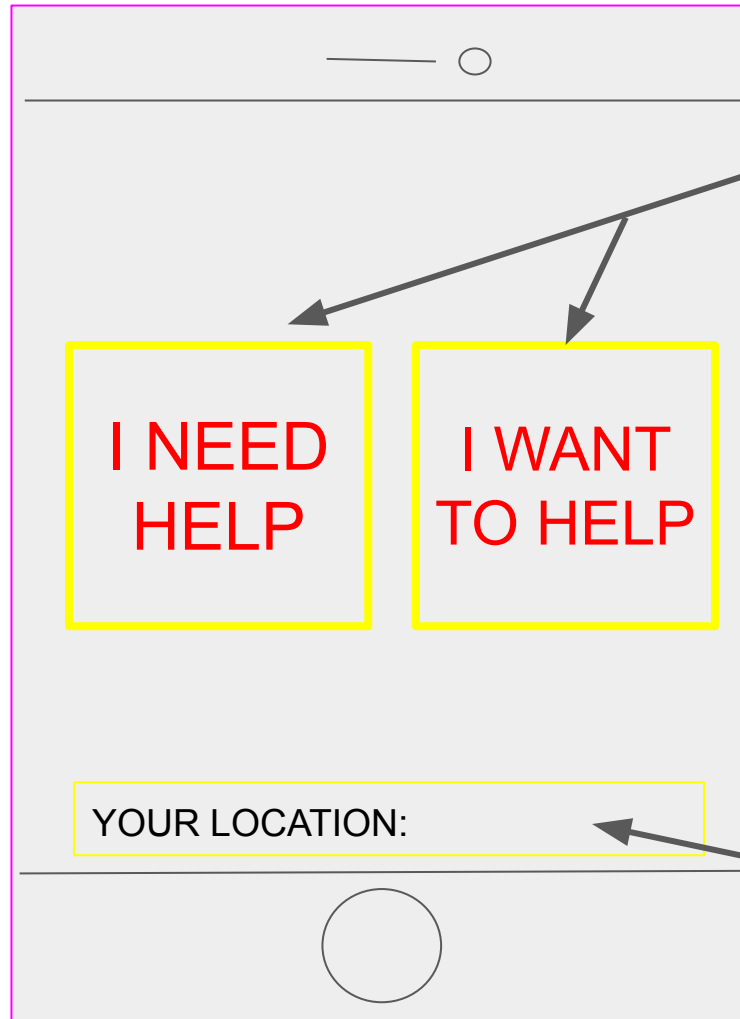

This is the app's logo. It was made by us using Paint 3D. It is a cute logo, ideal for older people. We chose these colors because we want to make it as showy as possible.

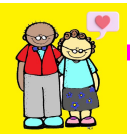

THIS IS
WHAT WILL
APPEARS
WHEN YOU
OPEN THE
APP AFTER
THE LOGO

HERE YOU
CHOOSE IF
YOU WANT TO
HELP OR YOU
ARE THE ONE
WHO NEED
HELP

HERE YOU PUT YOUR
LOCATION

Devices users need...

- CAMERA
- LOCATION
- MICROPHONE
- PHONE OR COMPUTER WITH ANY OPERATING SYSTEM

Why do we need ...?

- CAMERA: It is necessary. if they are talking in the application chat, For example, someone needs toilet paper. And the helper does not know which brand to take, so he/she can take a photo of different brands of paper and the prices, too. Then the helper sends the picture. Finally, the person will choose the best one.

Why do we need ...

- LOCATION: The location is necessary.

Both people, the one who needs help and the helper have to put their location in the app. So when someone wants to help, a map will appear with adults needs.

Why do we need ...

- **MICROPHONE:** The microphone is necessary for adults who have difficulties with reading or writing. So it would be easier if they send a voice message.

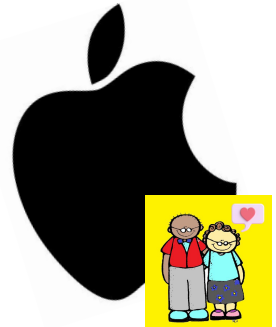

Why do we need ...

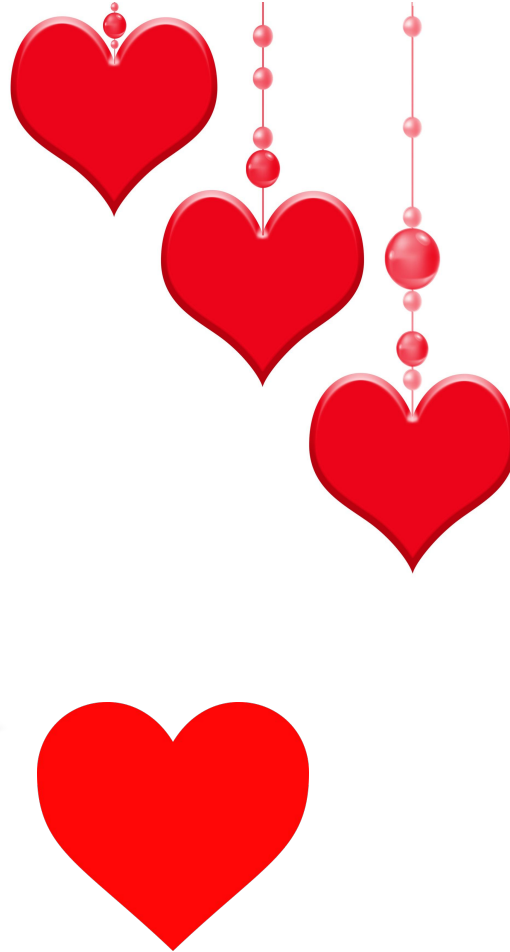

- PHONE OR COMPUTER WITH ANY OPERATING SYSTEM:

The application can be used with any device, computers, phones, tablets...

And with any operating system, android, ios or window
